Border Crossing and COVID-19

The U.S. is currently experiencing a very high number of COVID-19 cases. Crossing the border can put you, your family and the community at risk of getting COVID-19. If you must cross the border consider the following:

Before you cross into Canada:

You must be able to stay in Canada for a minimum of 15 days as required for self-isolation.

Please make arrangements ahead of time to have a suitable place to quarantine for 14 days upon entry, where you will have access to basic necessities (e.g. food and medication) and will not have contact with vulnerable people (e.g. adults aged 65 years or over, people with pre-existing medical conditions or those who are immunocompromised).

If you do not have a suitable place to quarantine for 14 days, call Ohsweken Public Health OR the COVID-19 Assessment Centre to make arrangements prior to entering Canada.

When you cross the border into Canada:

Carry documentation showing that you are a community member of Six Nations (e.g., Haudenosaunee passport, status card, birth certificate for a child age 15 or younger).

Call Ohsweken Public Health at 519-445-2672 OR the Six Nations Information & Assessment Centre at 1-855-977-7737 OR 226-446-9909 when entering Canada.

It is important that you drive straight to the place where you are being quarantined and self-isolate for 14 days. You could have the virus without knowing that you do!
